Display Gondola *perfect for book/CD display*

A Unique design, double sided book/CD display Gondola, available exclusively from United Aluminium

A unique and contemporary method of book/CD display is now available from United Aluminium.

Constructed using an Elliptical profile taken from our world renowned Modular Aluminium System, supporting three “buckets” formed from sheet metal, in three depths offering a tiered display at up to 5 levels.

The collective assembly is supported by a steel base plate and a fully adjustable skeleton foot.

As a finishing touch the elliptical post is topped with an acrylic top stack which is available in range of colour finishes and also carries the option of illumination. (please call for more details)

Starter Module Specification :

Overall length 1000mm (base to base)

Overall height 1450mm (including top stack)

Overall depth 650mm (at widest point)

“Bucket” details

Available in 3 depths 200mm, 250mm and 300mm. The height is 290mm and standard length is 750mm.

Price : £370.00
