

Ledge 105

Frame profile cross section

105mm deep LED lightbox, utilising side-firing illumination enabling flatpack delivery and 'Magnetik' display integration.

Ledge 105 is a freestanding, double sided LED lightbox, capable of flat-pack delivery thanks to interior-mounted drivers and LEDs featuring custom optics for precise, even illumination.

Created in sizes up to 3m x 2.25m, Ledge 105 utilises replaceable tension fabric graphics, ideal for fast-paced environments.

Magnetik is a concealed magnetic shelving system, which integrates seamlessly into Ledge 105. Magnetik mounts within the Lightbox itself and invisible from the outside, allowing display accessories to 'float' on your custom graphics.
